Subject Sampling complete for this week

We have completed this week's sampling effort. The shrimp collection was not successful with only 9 shrimp caught in the traps that were left out overnight. We were very successful with the crabs. The dominant crab species was red rock crabs and we caught quite a few that were very large (and mean apparently). We also caught 5 Dungeness crab. Mussels were collected today from 11 locations throughout the waterway. Next week we will be trawling Tuesday, Wednesday and Thursday.

Thanks.
Susie
